

ACOUSTIC ART PANELS

Acoustic Art Panels

Solid Ash, Maple, Black Ash, White Maple

Standard Sizes:

Square

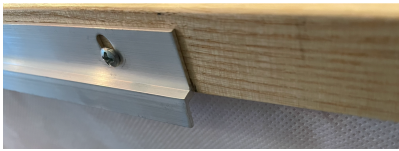

24" x 24", 29" x 29", 39" x 39"
49" x 49"

Rectangle

29" x 36", 29" x 40", 38" x 47",
39" x 54", 47" x 58", 47" x 65"

Thicknesses = 1/2", 3/4", 1-1/4"
Custom Shapes & Sizes Available

Standard Cleat

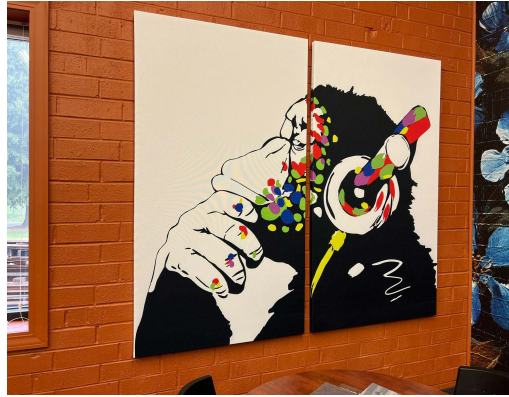

Acoustics

NRC 0.72 to 1.0

Reaction to Fire

ASTM E84 Class 'A'
CAN ULC 102 Class 'A'

STRUCTURE

Acoustic Art Panels are sound-absorbing panels that help to reduce background noise and the reverberation or echo in a space.

The core of our panels is Hemp, an excellent absorber, and the panel contains a cavity within its own thickness delivering excellent absorption performance.

The panel construction is a wood frame that is faced with a hemp absorber panel and an acoustic liner on the back that conceals the cavity.

ATTACHMENT OPTIONS

Panels are delivered by default with our standard panel hanger. One half is fixed to the top back frame of the panel and the other to the wall. The panel then sits on the wall cleat. Because of the angle of the cleat, the panel is held tightly towards the wall.

FABRIC & DIGITAL OPTIONS

Acoustic Art Panels have gallery wrapped edges for abutting edges or hardwood frames.

Choose from hundreds of scalable art, photography and public domain options from our Spark Digital Murals library or provide your own image/artwork.
